

# Meeting Agenda

Location: 3207

Date: 2012-05-16

Time: 14:30

Facilitator: *Emil Edholm*

Participants: Emil Edholm, Emil Johansson, Johan Andersson & Johan Gustafsson

## 1. Objectives (5 min)

Decide what is left to do and it's priority.

## 2. Reports (15 min)

Emil Johansson and Johan Andersson has started doing test, and clean out TODO's in the code.

## 3. Discussion items (35 min)

We need to update the domain model and the use case map in the RAD.

We also need to upload our meeting agendas and use cases to github (currently stored in Google Docs/Drive).

SDD is more or less finished. We need to look it over and finalize it.

We have scheduled a meeting next Sunday (20/5) to discuss and prepare our final presentation of the project.

We've also discussed the best way to dynamically unit test the IEnemy implementations.

## 4. Outcomes and assignments (5 min)

In addition to the assignments set up yesterday:

Everybody will test the project with coverage (eclemma) and remove unused methods and variables. (In essence, refactoring and code cleanup).

Emil Johansson and Johan Andersson continues with writing tests.

Johan Gustafsson will implement highscore and start preparing a short movie for the presentation. Johan will also correct the issue with reverse attackspeed.

Emil E: will update the domain model.

## 5. Wrap up

### 1. Unsolved ...

We have it pretty much covered.

### 2. Next meeting?

As previously stated, Sunday 20/5.
